

# NEMAGENIUS

Corrective – Liquid Chestnut Tannin Extract

Packaging: 1.3 - 6 - 12 - 25 Kg

## COMPOSITION:

Organic carbon (C) of biological origin	20%
Tannins	34%

**RAW MATERIALS:** Liquid chestnut tannin extract.

Produced with wood that has not been chemically treated after felling.

## TECHNICAL FEATURES:

**NEMAGENIUS** It is a liquid vegetal formulation based on tannins and rich in substances polyphenolic and organic acids, It allows for modification of the soil's chemical and biological properties, resulting from reaction, salinity, and sodium content. Its acid-loving organic component improves soil structure and mobilizes the nutrients necessary for the production of high-quality crops. NEMAGENIUS accelerates the absorption and assimilation of nutrients by plants, stimulates balanced root development, increases the availability of phosphorus to the plant, revitalizes exhausted soil, and stimulates the biological activity of microbial flora, accelerating the enzymatic processes of organic matter degradation and mineralization.

## PHYSICAL CHARACTERISTICS:

ph of the 1% solution: 3

Density: 1.25 g/cm<sup>3</sup>

## METHOD AND DOSAGE OF USE:

### RADICAL APPLICATION

Vegetable, fruit, flower and industrial crops:	3-4 days before of the transplant	3 Kg/1000m <sup>2</sup>
	At the time of transplanting, soak the roots	300 g/hl
	7 days post-transplant	1.5 kg/1000m <sup>2</sup>
	10 days since last intervention	1.5 Kg/1000m <sup>2</sup>
	repeat every 2 weeks	1.5 Kg/1000m <sup>2</sup>

**NB.** It can be applied either individually or in combination with other chemicals and fertilizers.

Avoid mixtures with copper and iron based products or those with an alkaline reaction.
