

# OLISOL-FRAG

Solid mixture of microelements

Packaging: 1 - 5 kg

## COMPOSITION:

Boro (B) from Water-soluble boric acid	2.4%
Water-soluble copper (Cu)	0.7%
Water-soluble manganese (Mn)	16.2%
Molybdenum (Mo) soluble in water	0.7%
Zinc (Zn) soluble in the water	4.8%

## TECHNICAL FEATURES:

OLISOL-FRAG is a blend of micronutrients specifically formulated for use in crops prone to chlorosis, primarily due to manganese and zinc deficiencies. It is intended for fertigation and foliar application. The micronutrients it contains, formulated in specific ratios that take into account the consumption of the main horticultural and floricultural crops, increase production and improve the qualitative and organoleptic characteristics of the crops.

## METHOD AND DOSAGE OF USE:

### FOLIAR APPLICATION

Allthe crops	200 g/hl
--------------	----------

### RADICAL APPLICATION

Allthe crops	3-5 kg/ha
--------------	-----------

### HYDROPONIC APPLICATION

Allthe crops	700 gr/tub
--------------	------------
