

# ALGA SUPER

Organic-Nitrogenous Fertilizer – Algae Extract in Solid Form

Packages: 1 - 5 - 20 Kg

## COMPOSITION:

Organic nitrogen (N)	1%
Water-soluble potassium oxide (K <sub>2</sub> O)	19%
Betaine	0.1%
Mannitol	4%
Organic carbon (C) of origin organic	20%

## TECHNICAL FEATURES:

ALGA SUPER is an extract of marine algae of the genus *Ascophillum Nodosum* Treated with a hydrolysis process, which activates and accelerates various physiological processes. ALGA SUPER promotes balanced leaf development. Its use promotes active plant metabolism during critical periods (vegetative recovery, transplanting, flowering, fruit set), stimulates chlorophyll activity, improves quality and organoleptic characteristics (color, sugars, size, etc.), increases specific weight, and improves fruit shelf life.

## PHYSICAL CHARACTERISTICS:

Specific weight: 0.76 Kg/lt

pH of the 1% solution: 9.2

Conductivity at 1% (mS/cm): 0.61

Solubility: 45g/100cc of water at 20°C

## METHOD AND DOSAGE OF USE:

### FOLIAR APPLICATION

Fruit trees, vines, citrus fruits, kiwi, olives:	From the vegetative phase, 4-5 interventions every 15 days	1 kg/ha
Fruit vegetables:	From grafting, 4-5 interventions every 15 days	1 kg/ha
Floricultural:	Start budding, throughout the vegetative phase every 15 days	100/1000 m <sup>2</sup>
Cereals and oilseed plants:	Start budding, throughout the vegetative phase every 15 days	1 kg/ha
