

OLIVO START

Fluid organic nitrogen fertilizer with boron and zinc

Packaging: 1.3 - 6 - 12 Kg

COMPOSITION:

Nitrogen(N) total	4.6%
Nitrogen(N)organicsoluble in water	4.4%
Boron (B) soluble in water	5.2%
Water-soluble zinc (Zn)	0.5%
Organic carbon (C) of biological origin	15%

Components:hydrolyzed animal epithelium, boric acid and zinc

TECHNICAL FEATURES:

OLIVO STARTIt is a foliar fertilizer specifically designed for olive growing.

OLIVO STARTIt is used at the beginning of the vegetative cycle, where, with the addition of amino acids, it stimulates photosynthetic activity. Boron increases pollen fertility and therefore fruit set and fruit production. Zinc is a micronutrient that stimulates the process .auxinic, an important hormonal element for vegetative recovery.

METHOD AND DOSAGE OF USE:

FOLIAR APPLICATION

Olivo tree:	Vegetative recovery	4 kg/ha
	Pinky	4 kg/ha

NB. OLIVO STARTIt is compatible with most pesticides. It is always advisable to carry out small tests to verify its compatibility. To ensure maximum assimilation of**OLIVE START**Treatments must be carried out during the coolest hours of the day.
