

AGRI K30

Simple potassium mineral fertilizer (potassium carbonate in solution)

Packaging: 15 - 25 - 300 - 1500 Kg

COMPOSITION:

Total nitrogen (N)	3%
Ureic nitrogen (N).	3%
Potassium oxide(K ₂ O) soluble in water (low chlorine content)	30%

TECHNICAL FEATURES:

AGRI K30 is a liquid fertilizer for foliar application and fertigation with a high potassium content that meets the nutritional needs of all crops, particularly during fruit growth and ripening. Potassium is an essential element in plant metabolism as it acts as an enzyme activator in the photosynthetic process and in the synthesis of sugars and proteins. Plants treated with AGRI K30 are more robust and resistant to adverse weather conditions and limited water availability. The use of AGRI K30 improves flower color and enhances the organoleptic qualities of produce (color, size, and shelf life).

PHYSICAL CHARACTERISTICS:

Specific weight: 1.53 Kg/l

pH of the 1% solution: 11.06

METHOD AND DOSAGE OF USE:

FOLIAR APPLICATION

Trees in general, kiwi, citrus fruits:	from fruit swelling	120-140 cc/hl
Fruit trees, vines, olive trees	from fruit enlargement	150-220 cc/hl

RADICAL APPLICATION

Fruit and vegetable gardens, nurseries:	from fruit swelling at first harvest	120-140 cc/hl
Vegetables, ornamental or flowering plants, lawns:		10-12 Kg/1000m ²
