

AGRI Micofol

Inoculation of specific action mycorrhizal fungi
Confezioni: 6 Kg

COMPOSITION :

Contents of mycorrhizae	1%
Content in bacteria of the rhizosphere	1x10 ⁷ UFC/g

TECHNICAL CHARACTERISTICS:

Agri Micofol promotes the production of auxins, increasing the vigor of the plant. Agri Micofol is a plant growth promoter, creating a thickening of the leaf cuticle for greater resistance to fungal infestations. Agri Micofol helps with the production of hormones, resulting in increased natural defense of plants. Agri Micofol is a liquid product for foliar and root use. The microorganisms present are stimulants for plant growth and health.

METHODS AND DOSAGE OF USE:

LEAF APPLICATION

All crops:	Doses per intervention, for 3 interventions every 15 days	3 Kg/ha
------------	---	---------

APPLICAZIONE RADICALE

Fruit crops, Vine, Citrus, Kiwi, Olive:	from the vegetative recovery for 2 interventions every 15 days	2-4 g/plant
Horticulture in greenhouses:	1 pre-transplant intervention and 2 post-transplant interventions	300 g/1000m ²
Field horticulture:	1 pre-transplant intervention and 2 post-transplant interventions	400 g/1000m ²
Flower gardens and herbal carpets:	from the vegetative recovery every 15 - 20 days	400 g/1000m ²
