

AGRIMAG Bio

Natural Magnesium Sulphate Mineral Fertilizer (Kieserite)

Packaging: 10 kg

COMPOSITION:

Magnesium (MgO) soluble in water	16%
Water-soluble sulfur trioxide (SO ₃)	32%

TECHNICAL FEATURES:

AGRIMAG Bio It is a water-soluble fertilizer based on Magnesium and Sulfur suitable for foliar and root use and in fertigation of all crops.

Magnesium is a constituent of the chlorophyll molecule that creates synergies with all nutrients, especially phosphorus and potassium. Sulfur is essential for soil fertility and plant life, playing a role in the formation of proteins, vitamins, and organic compounds.

PHYSICAL CHARACTERISTICS:

pH of the 5% solution: 8

Solubility in H₂O: 26.3%

METHOD AND DOSAGE OF USE:

FOLIAR APPLICATION

All crops:	post fruit set, 2-3 interventions every 10 days	8-10 kg/ha
------------	---	------------

Use is recommended in combination with HPF at 200 cc/hl

RADICAL APPLICATION

Fruit trees, vines, citrus fruits, kiwis:	From the vegetative recovery, 2-3 interventions	80-120 kg/ha
Vegetables:	2-3 interventions every 30 days	8-10 kg/1000 m ²

Use is recommended in combination with AGRIAMMIN Plus 200 cc/hl or AGRIVIVA (amino acids) 10-15 litres/ha to promote product absorption.
