

# AGRIMAN

Chelated Manganese Fertilizer Solution with EDTA

Packaging: 1.4 - 6 - 12 - 25 Kg

## COMPOSITION:

Manganese(Mn) soluble in the water	6%
Manganese (Mn) chelated with EDTA	6%

**Stable EDTA chelating agent between pH 3-12**

## TECHNICAL FEATURES:

AGRIMAN is a liquid manganese chelated with EDTA that is highly effective in treating crops deficient in this element. It can be used for both foliar and root applications. Manganese deficiency in leaves manifests as yellowing of the leaf blade in patches, while the veins remain green. AGRIMAN acts as an activating ion in photosynthesis and chlorophyll formation. AGRIMAN induces the reduction of nitrates in plant tissue and intervenes in the synthesis of amino acids and peptides.

## PHYSICAL CHARACTERISTICS:

pH of the 1% solution: 7

Conductivity at 1% (mS/cm): 0.68

Specific weight: 1.30 Kg/lt

## METHOD AND DOSAGE OF USE:

### FOLIAR APPLICATION

Fruit trees, vines, actinidia:	2-2.5 lt/ha
Citrus fruits:	2.5-3 lt/ha
Vegetables:	150-200 cc/hl
Ornamental:	50-80 cc/hl

### RADICAL APPLICATION

All crops:	8-16 liters/ha
------------	----------------

Use is recommended in combination with AGRIAMMIN Plus at 5-10 kg/ha per intervention
