

CALCIOLID

Calcium chelate EDTA

Packaging: 1 - 5 Kg

COMPOSITION:

Water-soluble calcium (Ca)	10%
Calcium (Ca)EDTA	10%

Complexed with: EDTA stable at pH 3-7

TECHNICAL FEATURES:

CALCIOLID is a powdered product indicated for preventing and controlling calcium deficiency. Thanks to the action of chelated calcium, the product is characterized by a high absorption capacity, allowing for greater resistance of cell walls and their turgidity. CALCIOLID improves the shelf life of fruits and their handling.

PHYSICAL CHARACTERISTICS:

Soluble powder

METHOD AND DOSAGE OF USE:

FOLIAR APPLICATION

Fruit trees:	1st treatment from the end of flowering until the fruit is nut-like, every 7 days	80-100 g/hl
Vegetables:	3-4 treatments after fruit set, every 10 days	100 g/hl
Strawberries:	3 interventions from fruit setting, every 10 days	100-150 g/hl
