

NATURAL RED

Liquid Organic Fertilizer – Mixture of Organic Fertilizers – Fluid Blood

Packaging: 1.3 - 6 - 12 - 25 - 270 - 1300 Kg

COMPOSITION:

Total nitrogen (N)	5%
Water-soluble organic nitrogen (N)	5%
Organic carbon (C) of biological origin	28%

TECHNICAL FEATURES:

NATURAL RED is a fertilizer liquid, mixture of nitrogenous organics. This formula provides long-term nutrition for orchards (pome and stone fruit), grapevines, citrus fruits, kiwis, olives, vegetables, lawns and turf, gardens, shrubs, flowers, and ornamental plants. The formula contains organic nitrogen, which ensures long-term, balanced nutrition for plants without losses due to leaching or runoff.

Since it is made up of amino acids, it is easily absorbed by plants; therefore, treated plants are able to achieve greater cell multiplication, appearing more lush and green, and the fruits are heavier and larger, with an increase in flavor and color.

NATURAL RED also has a good supply of Organic Carbon, which is essential for promoting root development and also for improving the chemical-physical characteristics of the soil.

PHYSICAL CHARACTERISTICS:

Specific weight: 1.32 Kg/Lt

pH of 1% solution: 6.41

Conductivity at 1% (mS/cm): ND

METHOD AND DOSAGE OF USE:

FOLIAR APPLICATION

Arboreal:	6-8 kg/ha
Horticultural, Industrial:	10-15 kg/ha
Ornamental, Floricultural, Lawn:	500 cc/hl

RADICAL APPLICATION

Trees (kiwi, vine, citrus fruits, pome fruits, stone fruits):	Split into 4/5 interventions every 10 days	150-300Kg/ha
Vegetables (from fruit or leaf):	From the transplant divided into 4/5 interventions every 10 days	100-150 kg/ha
Ornamental, Floricultural, Lawn, Gardens:	Presowing and pre-transplant interventions at 10 days	10 / 15 kg /1000 m ²
