

# PHOSPHORUS 54% Radical

Simple mineral fertilizer with a high phosphorus content

Packaging: 15 - 25 - 300 - 1500 Kg

## COMPOSITION:

Water-soluble phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> )	54%
---	-----

## TECHNICAL FEATURES:

FOSFORO 54% is a liquid fertilizer with a high phosphorus content, a key element for plant metabolism. FOSFORO 54% promotes rapid growth and proper plant development. Its use is recommended during the early stages of plant growth, when the plant is actively growing, to encourage root development. Application at the onset of vegetative growth promotes abundant flowering, while post-flowering applications improve the organoleptic characteristics of the fruit. The use of FOSFORO 54% in fertigation reduces the risk of precipitate formation in the presence of Ca and Mg ions. FOSFORO 54% is also recommended for lowering the pH of alkaline soils. It is useful for acidifying the nutrient solution.

## PHYSICAL CHARACTERISTICS:

Specific weight: 1.57 Kg/lit pH

of 1% solution: 1.1

Conductivity 1% (mS/cm): 1.2

## METHOD AND DOSAGE OF USE:

### RADICAL APPLICATION

Vines, fruit trees, citrus fruits:	throughout the crop cycle	80-120 kg/ha
Cleaning the irrigation system:	spring and autumn	30 kg/intervention
